

Product Bulletin

Non-Interchangeability of
COMBO-JET® Pre-orifices
Bulletin Revised: April 1, 2017
Bulletin Date: Feb 1, 2006
Bulletin Reference: 060201-01

Better Engineered Sprayer Components for Over 40 Years

This Bulletin refers to COMBO-JET® SR, MR, DR, UR series of tip-caps:

Pre-orifice Color

SR, MR, DR, UR tip-caps include a pre-orifice. The MR & DR pre-orifice is the same color as the tip-cap. The SR & UR pre-orifice color may differ from the tip-cap. UR series tip-caps have two snap-in pre-orifices, one short and one long.

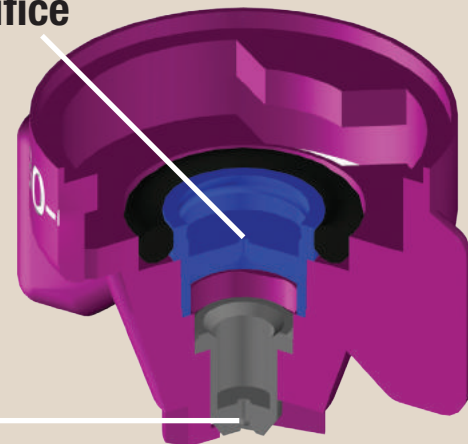

Pre-orifice Non-interchangeability

The tip-cap and pre-orifice cannot be interchanged between tip-cap series (SR/MR/DR), as the relative size of the pre-orifice to the exit orifice determines the flow rate and droplet size of the tip-cap. However, pre-orifices of the same size/color as each other are interchangeable and replaceable, given need for replacement. [Other than UR series pre-orifices]

Pre-orifice

Exit Orifice

Proper Orientation and Use of Pre-orifices

The orientation and use of pre-orifices is required with the use of any Combo-Jet® tip-caps that are designed to be used with pre-orifices. **NEVER** operate COMBO-JET® spray tips without pre-orifices snapped in and seated correctly.
